SOLUZIONI FOODSERVICE

Solid, functional and with a clean design, the SENO&SENO toilet paper roll holder is made entirely of satin-finish stainless steel, ideal for public spaces, professional environments or modern bathrooms where robustness and aesthetics must coexist.

Equipped with a Ø100 mm plate with a Ø48 mm welded hole, pre-drilled for wall mounting, it ensures a stable and long-lasting installation. The satin-finish Ø48 mm stainless steel tube (length 120 mm) ensures high capacity and durability.

The structure is completed by:

- Ø100 mm printed plate cover for an elegant finish;
- Flat terminal with M8 thread and turned washer Ø65 mm, 9 mm thick, with countersunk central hole;
- M8 conical screw with hexagonal hole, for practical and safe assembly.

Perfect for those looking for a durable, hygienic and professional-quality bathroom accessory, with an essential design that adapts to any context.
