SOLUZIONI FOODSERVICE

Elegant, durable, and a must-have for any special occasion, our double-walled champagne and wine cooler keeps your bottles perfectly chilled throughout the party.
Made of high quality stainless steel, it combines professional style and maximum functionality.

Freshness that lasts

The double-walled insulated construction prevents heat from penetrating and keeps the bottle at the ideal temperature longer. Perfect for 0.75L bottles, it can also hold 1L bottles like classic Jim Beam or Jack Daniel's whiskeys.

When needed, it transforms into a refined ice bucket, slowing down the melting of the cubes.

How does it work?

Simply insert a pre-chilled bottle to obtain an immediate preservation effect.

For optimal performance, we recommend placing the cooler in the freezer for about an hour before use: the combination of a cold bottle and a frozen container ensures prolonged freshness. With smaller bottles, you can add ice between the inner walls for even more effective results.

MAIN FEATURES

- Material: stainless steel
- Capacity: 1.6 L
- Height: 20 cm
- Diameter: 12 cm
- Produced by an Italian brand specializing in professional bar accessories
- Dual function: bottle cooler / ice bucket
