## INTENSIVE LIQUID DETERGENT

Recommended for all types of stainless steel, synthetic materials, and porcelain dishes.  
Not suitable for aluminum.

## DESCRIPTION

Winterhalter F8500 detergent comes in 25 kg packs and is suitable for washing dishes and utensils in professional kitchens.

Suitable for normal dry dirt residues.

## WHAT IS WINTERHALTER F8500 DETERGENT FOR?

Not suitable for aluminum or silver. Multipurpose sanitizing liquid detergent. Highly alkaline, contains active chlorine. Removes stubborn dirt and acts on grease and protein residue.

High-quality porcelain dishes, brilliant white or matte black, without residue or marks. Simply perfect. When dishes are perfectly clean, they make a beautiful impression. Winterhalter helps you achieve this goal with specific dishwashing chemicals: detergents have been developed for all types of soiling and remove even stubborn food residues like grease, starch, or proteins. Rinse aids ensure quick, streak-free drying. Together, they guarantee perfect dishwashing results.

## USE OF F8500 DETERGENT

Original Winterhalter detergent should be used with the same brand of rinse aid. Ideally, this detergent should be combined with the B100N multipurpose rinse aid.

Recommended dosage: 2/4 ml/l

Suitable for medium hardness water.
