Santos SCF 50 Single-Phase Electric Centrifugal Juicer, 220V, Friction Drive

# SOLUZIONI FOODSERVICE

## CHARACTERISTICS:

Basket holes diameter 0.5mm  
Stainless steel basket, filter and sieve  
Capacity 40-100 lt./hour  
Speed 3000 rpm  
Power 800W Single Phase 220V  
Weight 16kg  
Dimensions mm260x470x450H

Professional juice extractor. Built to last, equipped with an asynchronous motor with thermal protection. Quiet and robust, constructed from high-quality food-grade materials: motor body, blades, bowl and filter are all stainless steel, lid, 7.5-liter waste container and polyethylene pusher, non-slip feet, and rubber joints to absorb vibrations. All removable parts are dishwasher safe for easy and convenient cleaning. It extracts complete juice and vitamins from fruits and vegetables, without the need to clean or chop the fruit, thanks to the spacious 79.5 mm feeding tube, obtaining an average of 7 liters of juice per 10 kg of fruit.

Maximum safety: patented system, equipped with a safety microswitch and a mechanical brake for immediate stop when the appliance is opened. Suitable for continuous production. Suitable for all types of glasses or carafes, max. height 200 mm. Equipped with a start/stop button. Comes with a basket filter with a stainless steel sieve with 0.5 mm diameter holes.
