

MIXING GLASS SCAGNER ML. 1400

The Bars "Scagner" Mixing Glass – 1.4 Liters (Handmade in Murano)

SOLUZIONI FOODSERVICE

Elevate the art of bartending with a unique piece of authentic Italian craftsmanship. The Scagner 1.4-liter Mixing Glass, created by the renowned brand The Bars, is entirely handmade by master glassmakers in Murano. Each piece embodies the age-old tradition of Venetian glassmaking, combined with the demands of modern mixology. Thanks to its exceptional 1400 ml capacity, this Mixing Glass is perfect for preparing multiple servings of iconic stirred cocktails like the Negroni, Martini, or Manhattan, optimizing service time during even the busiest evenings. The pronounced spout ensures a precise, flawless flow when pouring with the strainer. Why is it a premium product? - Murano Excellence: It is not just a simple work tool, but a unique, handmade piece. Small imperfections or variations testify to the authenticity and craftsmanship of the blown glass. - Thermal Insulation and Strength: The structural thickness of the glass not only makes it incredibly sturdy and durable over time, but also offers extraordinary cold retention. Ice melts more slowly, reducing unwanted dilution of the cocktail. - Exclusive Details: The imposing size and dedicated laser-engraved finishes give the product a refined and professional aesthetic, which will not go unnoticed on the bar. FEATURES: - Handmade by artisans in Murano (Venice) - High-thickness and high-resistance artistic glass - Capacity: 1.4 Liters (1400 ml) - Dimensions: Bottom diameter: 8 cm | Top diameter: 12 cm | Height: 24 cm - Use: Mixing cocktails (Stir & Strain technique) Bartender's tip: A mixing glass of this size is the perfect stage for classic cocktails. For impeccable service, we recommend chilling the Scagner Mixing Glass for a few minutes before use: the thickness of the Murano glass will maintain the glacial temperature for the entire duration of mixing.
