Keep your Rational oven efficient, clean, and protected for longer. These high-performance cleaning tablets are specifically formulated for the automatic cleaning systems of Rational combi ovens. Thanks to their new eco-friendly formula, they guarantee deep cleaning and exceptional limescale protection, safeguarding both the environment and your investment.

INTENDED USE AND COMPATIBILITY These tablets are designed exclusively for professional use on Rational cooking systems equipped with an automatic cleaning system: - Rational SelfCookingCenter® (SCC) (with CareControl system) - Rational CombiMaster® Plus (with automatic cleaning function) - Suitable for both electric and gas models (CLP Standard).

STRENGTHS AND BENEFITS - **New Eco-Friendly Formula:** Totally free of phosphates and phosphorus, it reduces environmental impact without compromising on degreasing power. - **Maximum Cleaning Effectiveness:** Effortlessly removes the most stubborn grease residues and cooking encrustations, preventing the formation of unpleasant odors. - **CareControl Function:** Performs an active descaling action, protecting the steam generators and the cooking chamber from limescale, prolonging the useful life of the oven. - **Energy and Chemical Savings:** The super-concentrated formula ensures maximum performance with the lowest detergent consumption per cycle.

TECHNICAL SPECIFICATIONS AND SAFETY To ensure correct warehouse management and compliant shipping, the product complies with the following standards: - **Package contents:** 1 resealable bucket of 130 units (tablets). - **Formulation:** Concentrated solid tablets (new phosphate-free formula). - **Dangerous Goods Classification (Transport):** UN 3262 (Corrosive solid, basic, inorganic, nos). - **Compliance:** Complies with the CLP Standard (Classification, Labelling and Packaging of Chemicals) for maximum safety of use in professional gas and electric ovens. **Safety advice:** As this is a professional product classified as UN 3262, we recommend using gloves and protective glasses when handling and following the manufacturer's safety data sheets (SDS).
