SOLUZIONI FOODSERVICE

Bring the excellence of international pastry making into your kitchen with the professional peanut-shaped single-serving and miniature dessert kit, created by Silikomart in exclusive collaboration with renowned Pastry Chef Miquel Guarro. This complete kit has been designed down to the smallest detail to allow you to create incredibly realistic three-dimensional desserts. A perfect combination of design and functionality, it's ideal for wowing your customers or guests with a geometrically complex yet easy-to-make shape. A complete kit: 3D mold and custom cutter. The kit not only includes the mold, but is a true integrated pastry solution that includes:

- The 3D silicone mold: Featuring a revolutionary, patented internal border that rounds the base of your creations, eliminating sharp cuts and giving your peanuts a perfect, lifelike three-dimensional volume.
- The ABS cutter: An exclusive shaped pastry cutter that allows you to create perfect bases in shortcrust pastry or crunchy pastry, or custom-made internal inserts that adapt precisely to the peanut shape. Professional performance from freezer to oven Made of 100% platinum liquid silicone, this mold guarantees impeccable performance both in flexible laboratory production and in the home kitchen:
- For semifreddo, mousse and inserts: It withstands the most rigid temperatures of the blast chiller. The flexibility of the material ensures smooth demoulding, keeping the characteristic surface veining of the peanut intact.
- For cooked preparations: With excellent heat resistance, it is ideal for baking small cakes or soft bases.
- Total certified safety: The mold is completely safe for health, certified BPA Free and PFAS Free, does not alter flavors and is dishwasher safe for intensive professional use.

Technical Data Sheet and Dimensions - Designer: Miquel Guarro - Line: Silikomart Professional - Model: Kit Peanut (Mignon Peanut) - Kit contents: 1 silicone mold + 1 ABS cutter - Number of cavities: 12 - Dimensions of each cavity: 72 x 29 mm | Height 27 mm - Single cavity volume: 30 ml - Total volume: 360 ml - Thermal resistance of the mould: From -60°C to +230°C - Compatibility (mold): Suitable for oven, microwave, blast chiller, freezer and dishwasher.
