SOLUZIONI FOODSERVICE

The scents and timeless charm of the Sorrento Coast's typical citrus fruits come to life in your creations with the Delizia al Limone 3D silicone mold from Silikomart's 3Design line. This professional mold allows you to revisit one of Italy's most beloved desserts, transforming it into single portions with a modern and elegant three-dimensional effect. Whether you're creating a classic delizia with custard and limoncello or an innovative fruity mousse, this tool will guarantee flawless results, bringing a fresh, sunny, and visually striking shape to your e-commerce site or your kitchen. The secret of 3D realism: the patented internal border. Like all molds from Silikomart's revolutionary 3Design line, the cavities feature a special patented internal border. This unique curvature gives a slightly rounded shape to the base of your creations when unmolding, eliminating sharp edges and corners. The finished dessert will be a perfectly spherical single-portion with a soft base, ideal for mirror frosting or decorating with velvet spray. Professional performance from freezer to oven. Made from 100% premium-quality platinum liquid silicone, the mold ensures maximum performance and versatility at every stage of production: - For semifreddo, mousse, and ice cream: It withstands the harshest temperatures of the blast chiller and freezer. The flexibility of platinum silicone allows for smooth and effortless unmolding, preserving every detail of the surface. - For baked goods: Thanks to excellent thermal stability, it is perfect for baking small cakes, soft biscuits, or baked bases. - Guaranteed safety and hygiene: The mold is completely free of toxic substances, certified BPA-free and PFAS-free. It does not alter flavors and is dishwasher-safe, designed to withstand intensive use in the laboratory. Technical Data Sheet and Dimensions - Line: 3Design Silikomart - Model: Delizia al Limone (Single-serving Citrus Fruit) - Number of cavities: 6 - Single cavity dimensions: 85 x 59 mm | Height 42 mm - Single cavity volume: 106 ml - Total volume: 636 ml - Thermal resistance: From -60°C to +230°C - Compatibility: Suitable for oven, microwave, blast chiller, freezer and dishwasher.
