Silikomart 3D Fruit Silicone Mold 'Fruit Inspirations' (6 Cavities)

SOLUZIONI FOODSERVICE

Modern pastry making marries nature with the 3D Fruit Inspirations silicone mold from Silikomart's 3Design line. This professional mold was designed to allow you to recreate incredibly realistic single-serving apple, peach, and apricot-shaped desserts. Whether you're a professional pastry chef or a lover of fine homemade pastry, this tool will allow you to showcase fruity, fresh, and colorful creations with a single, versatile mold. The secret of 3D realism: the patented internal border. Unlike traditional flat molds, Silikomart's 3Design line stands out for its revolutionary internal border. This special curvature slightly rounds the base of your creations, eliminating sharp edges when unmolding. The result? A flawless, smooth, three-dimensional single-serving dessert that faithfully reflects the fruit's original shape, ready to be glazed or decorated with a velvety effect. Professional versatility: from freezer to oven Made of the highest quality platinum liquid silicone, the mold guarantees excellent performance in any laboratory or kitchen condition: - For semifreddo and mousse: Ideal for a quick transfer to the blast chiller; the flexibility of the silicone allows for perfect unmolding without damaging the fruit details. - For cooked preparations: Resistant to high temperatures, it is perfect for baking cakes, biscuits or cooked inserts. - Maximum hygiene and safety: The mold is completely free of harmful substances, certified BPA Free and PFAS Free, and is dishwasher safe for infinite reuse.
