SOLUZIONI FOODSERVICE

Keep your accelerated cooking oven always in optimal hygienic conditions and eliminate downtime with the Lainox OWB Oracle Washable Box. This original Teflon insert is designed specifically for the cooking chamber of the Lainox Oracle XS oven, designed to protect the internal walls from grease splashes, smoke, and food residue. Supplied standard with the oven, having an additional or replacement box is the perfect strategic solution for high-traffic establishments (bars, fast food restaurants, service stations) that cannot afford to interrupt service to clean the oven during peak hours. Why is it an essential accessory? - Continuous Service (Zero Waiting Time): When the box in use gets dirty, simply remove it, immediately insert the clean replacement box, and restart service. You'll be able to clean the first box at the end of the day! - Maximum Oven Protection: Prevents grease and cooking residues from encrusting on the internal walls of the oven, preserving its technological efficiency over time and extending its useful life. - Flash Cleaning: Made of the highest quality beige Teflon, it is ultra-non-stick. Residues slide off and it is very easy to wash by hand in the sink or directly in the dishwasher. - Robust and Durable: Designed to withstand the intense pace of professional kitchens and the very high temperatures of the Oracle XS oven's combined cycles. TECHNICAL SPECIFICATIONS: Manufacturer / Brand: Lainox Model Code: OWB (Oracle Washable Box) Compatibility: Lainox Oracle XS accelerated cooking oven Material: High-resistance Teflon Dimensions: 305 mm (Width) x 180 mm (Height) Weight: Only 250 g Colour: Beige
