# SOLUZIONI FOODSERVICE

The moka spoon from the EAT collection by Pintinox stands out for its essential and functional design, specifically designed for the modern needs of the B2B, catering, and high-end hotel sectors. Crafted from 1.8 mm thick 18/10 stainless steel, this piece of cutlery offers a perfect balance between lightness and structural strength. At 108 mm long, it is ideal for smaller espresso cups and traditional moka pot service, ensuring excellent resistance to mechanical shock and easy sanitization. The mirror-polished finish enhances the aesthetics of your countertop and table, maintaining its shine even after prolonged daily use and frequent washing in a commercial dishwasher. Why choose it: A reliable, durable choice with a contemporary design, ideal for bars, caterers, and foodservice professionals who pay attention to every detail of their coffee service. TECHNICAL DATA: - Material: 18/10 stainless steel - Length: 108 mm - Thickness: 1.8 mm - Finish: Polished
