SOLUZIONI FOODSERVICE

French Excellence and Precision at the Service of Your Kitchen The De Buyer Viper Mandolin is the perfect combination of patented innovation, safety, and professional cutting performance. Designed to meet the demanding needs of commercial restaurants and the ambitions of home chefs, it offers extraordinary versatility in a solid and ergonomic structure.

- Smooth V-Shaped High Penetration Blade: The V-shaped cutting angle reduces resistance during sliding, allowing you to slice easily and without crushing even the most delicate, ripe, or fibrous foods (from strawberries to tomatoes to citrus fruits).
- Integrated CUBE SYSTEM Mechanism: Simplifies the preparation of perfect brunoises, cubes, and diamonds without having to constantly change plates. An intuitive adjustment button allows you to set the desired mode in seconds.
- Millimetric Adjustment (1 - 8 mm): The practical side wheel allows for quick and accurate control of the thickness of the slices, ideal for carpaccio of firm vegetables or thicker cuts.
- Total Safety and Operator Protection: The ergonomic pusher with rotation guide protects your hands from sharp blades, while the non-slip folding feet ensure maximum stability on the worktop, reducing fatigue and risks.
- Space-Saving and Compact Design: Once you're done using it, the feet fold up for minimal space in the pantry or among your line equipment.

Cutting Modes and Accessories Included: With the set of combs and the adjustable plate, you can create 3 types of Julienne cuts, as well as slices and complex geometries:

- Slices and Round Slices: Adjustable thickness from 1 to 8 mm.
- 3 Julienne Cuts (4 mm, 10 mm and adjustable options): For sticks and matchsticks perfect for salads, fried foods or side dishes.
- Cubes and Diamonds: For impressive garnishes and quick gourmet preparations.

Features:

- Cutting Thickness: Adjustable from 1 mm to 8 mm via knob
