

EXOGLASS SPOON cm.9x6x38

Professional spoon in Exoglass, an innovative material, is light, resistant, and adaptable from -20° to +250°.

SOLUZIONI FOODSERVICE

This Exoglass Spoon CM.9x6x38 is aimed at true kitchen professionals. Exoglass, an exclusively manufactured plastic material made by Matfer, gives this kitchen tool its unique features: it is compact, non-porous, pleasantly tactile and allows for a secure grip. Its rigidity, resistance and lightness make it a long-lasting and non-deformable tool. Furthermore, it is suitable for use in the dishwasher, refrigerator, microwave and oven, resisting from -20° to $+250^{\circ}$. Its excellent thermal conductivity, fast cooling after use and easy cleanability make it indispensable in the kitchen of the most demanding chef or pastry chef. Perfect for use with non-stick cookware.
