CODICE: 0180002480050

SOLUZIONI FOODSERVICE

Glass available in various colors.

Polycarbonate, derived from the compound and is used in the synthesis of plastics.

The main characteristics are: RESISTANCE and HARDNESS.

Transparency: It has a transparency index of 0.86, therefore good.

Resistance: It has excellent impact resistance, is unbreakable and very resistant.

It is the plastic material more resistant to scratches and bumps, as well as having a higher elasticity than other plastic materials and has less tendency to yellow than Plexiglas.
