# SOLUZIONI FOODSERVICE

This is more than just a scraper replacement - it's a high quality blade, designed to last, saving you time and effort. Made of cemented tungsten carbide, it maintains sharpness much longer than classic steel blades, even lasting up to 50 times longer. Its slightly convex shape, the result of precise sanding, preserves the work surface. With its double cutting edge and a weight of just 10 grams, it is very simple to handle, rotate and reposition, adapting to any radius or angle. A real ace up the sleeve for those who love working in the kitchen with professional tools.
