SOLUZIONI FOODSERVICE

This handcrafted professional sieve takes the art of sieving and drying fresh pasta to another level. Made with an untreated fir wood frame, it ensures strength and durability, remaining a natural and safe product for contact with food. The stainless steel mesh guarantees a precise and homogeneous sieving operation. And there's no need to worry about the net sagging, thanks to the anti-sagging reinforcements embedded in the wood. In short, a reliable partner for every chef or cooking enthusiast who does not give up on quality. Here are the materials: untreated fir wood and stainless steel.
