

WHIZARD CUT RESISTANT GLOVE SIZE 9 - L new model

vedi prodotto online

SOLUZIONI FOODSERVICE

The HANDGUARD II WHIZARD protective glove sets the standard for the quality and effectiveness of protective gloves. It is used in the agro-food industry of pork, beef, sheep, horse, poultry, in the processing of fish products, in slaughtering, cutting, boning, in the preparation and handling of blades. The HANDGUARD glove offers excellent hand protection thanks to outstanding resistance against cuts and lacerations and this without compromising the pleasant wearing comfort.

protective glove

The HANDGUARD II glove is made with a double thread composed of a set of special fibers: Spectra, Kevlar and stainless steel offering the highest level of protection of all fabric gloves. Offers the highest cut resistance of all the Whizard protection range.

The user will appreciate the comfort of the HANDGUARD II glove which offers exceptional softness and flexibility. The fabric reduces perspiration. The ergonomic design allows great freedom and precision of movement.

Thanks to the exceptional resistance to abrasion and wear, the HANDGUARD II glove ensures a long life, reducing costs for the company. Easy to maintain and washable by hand and in any type of machine up to 95°C.

Easy to handle, this model is ambidextrous and reduces inventory costs. The color coding of the sizes makes it easy to change them. Pre-washed and sanforized.

IMPORTANT:

Whizard protective items are extremely cut resistant, but are not fully cuttable and do not guarantee against sharp objects or blades. Do not use with high speed blades or serrated blades. Always turn off the power before cleaning or removing sharp blades from machines.
