

PLASTIC MONOBLOC ICE SHOVEL cm.33x38x112

Monobloc shovel in polypropylene: ideal for food and ice, resistant, light and with a practical handle.

SOLUZIONI FOODSERVICE

If you are looking for a professional kitchen accessory, here is an ice shovel made of polypropylene, a material resistant even to very low temperatures. An ideal utensil for handling food, including snow. It combines resistance and lightness, thanks to the quality of the material. Designed as a monobloc, it boasts a short handle, comfortable to hold thanks to its "D" shape. In addition to being super robust, it is simple to sanitize, thanks to its waterproof surface. Ideal up to 120°C and is safe for contact with food.
