SOLUZIONI FOODSERVICE

Ideal for accurately and easily measuring your liquids in the kitchen, this 500 ml graduated jug combines practicality and resistance. Made of food-safe polypropylene, you won't be afraid to stick the carafe in the microwave for a short time, up to a temperature of +125°: your perfect ally for table preparations or pastry making. Not only. After using it, you can easily wash it in the dishwasher. The design includes a convenient handle and spout for precise, mess-free pouring. Marked graduations in liters and milliliters make measuring a breeze. A quality product made in Germany.
