

ROUND ALUMINUM COVER AL-BLACK diameter cm. 24

ALBLACK NON-STICK ALUMINUM LID diameter cm.24 AL-BLACK LINE LAMB WITH STAINLESS STEEL HANDLE

SOLUZIONI FOODSERVICE

DURATION:

if of adequate thickness, excellent resistance to impact, thermal shock, abrasion and corrosion. It does not require maintenance.

HANDLE:

in 18/10 stainless steel tubular, non-conductive of heat and applied to the body with AG5 alloy rivets.

PAINTING:

internal and external with black B-Cristall

THE ASSETS:

- Ease of use and ease of cleaning.
- Safety from the hygienic point of view.
- Compliance with laws on containers in contact with food.
- Lightness thanks to the reduced specific weight.

USEFUL TIPS:

There are various types of non-stick application: the so-called rolled technique, which is applied to the disc before molding the container, therefore much less resistant and subject to flaking, and the spray technique, carried out in several layers directly on the already worked body with guaranteed products and therefore normally used for the manufacture of professional containers.

CHARACTERISTICS:

Coating: B-Crystal
