SOLUZIONI FOODSERVICE

Our Stainless Steel Mesh Strainer, 7cm in diameter, is the perfect kitchen accessory for sieving and draining your food. Rich in originality and functionality, it is characterized by the robustness of its mesh, which guarantees excellent resistance and reliability over time. The attention to detail is remarkable as demonstrated by the welding to the body, refined and resistant. This article can be used in different ways, thanks to the possibility of having various types of holes and net, including reinforced ones. The stainless steel material makes this utensil highly durable and suitable for the modern kitchen that requires speed and quality simultaneously. An essential element for the most demanding chefs who aim for high-level culinary preparations.
