

STAINLESS STEEL LADLE cm.18X64 cl.150

SOLUZIONI FOODSERVICE

Discover the practicality and elegance of our professional ladle. This utensil, 64 cm long and with a capacity of 150 cl, was entirely produced in AISI-304 stainless steel, a material known for its robustness and durability over time. The one-piece structure and the solid 3mm thick handle make it ideal for intensive professional use, while ensuring its unalterability over time. An important detail is the curved handle end, which allows it to be hung easily. This is the result of careful research, aimed at guaranteeing quality and daily safety. Choosing the right tool is the first step towards successful cooking.
