SOLUZIONI FOODSERVICE

The reinforced stainless steel colander with plastic handle, 26 cm in diameter, is the result of over 60 years of Italian artisan experience in the hotel sector. The production, certified ISO 9001, uses only first-rate steel, guaranteeing a resistant and quality product. The salient feature of this sieve lies in its quality tinning, carried out with double fire tinning, using 99.9% pure tin. This in particular increases hygiene and durability. It represents an indispensable kitchen tool for various sieving and draining functions.
