SOLUZIONI FOODSERVICE

This thermal carafe, made of sturdy polypropylene, is the essential tool for every chef or cooking lover. With its capacity of 3000 ml, it allows you to dose liquids accurately thanks to the clearly marked graduated scale, both in liters and milliliters. Its thermal resistance also makes it suitable for use in microwaves for short periods, supporting temperatures up to +125°. Particularities of the carafe are the spout, which facilitates the pouring of liquids, and the ergonomic handle which guarantees an excellent grip. To ensure maximum ease of use, it is dishwasher safe. Product made in Germany, synonymous with quality and resistance.
