SOLUZIONI FOODSERVICE

Discover the practicality of the 5000 ml graduated thermal carafe, perfect for measuring your liquids with precision. Made of polypropylene, one of the safest materials for contact with food, it features a scale marked in liters and milliliters that allows you precise measurements. Equipped with handle and spout to facilitate pouring. You can safely use it in the microwave for short periods, up to a temperature of +125°. It is not afraid of the dishwasher and gives a touch of professionalism to your kitchen. Product made in Germany.
