SOLUZIONI FOODSERVICE

The 28 cm basketless frying pan is your essential kitchen tool. Made of iron, it is known for its excellent heat diffusion properties, making it perfect for flawless frying. It acts as an effective replacement if your electric fryer fails. The pan should be washed with very hot water, then reheated with about 1 mm of oil. The heated oil should be removed and the pan dried using paper towels. With continued use, the pan improves cooking performance and becomes more non-stick. Reliable for use on induction hobs, but should not be overheated. Made in France, not dishwasher safe. Features: - Made of durable iron - Ideal for frying - Improves cooking performance with frequent use -
