# SOLUZIONI FOODSERVICE

This infrared thermometer was developed for fast measurements on all types of surfaces for HVAC and industrial applications. The new high resolution sensor is able to give results with high precision. Thanks to the max and min function, you can set limit values according to your needs. When these values are exceeded, the instrument emits a visual and audible alarm.

## TECHNICAL DATA

- Measurement point distance 12.1
- Measurement range with K probe from -50 to +500°C
- Infrared measurement range from -30 to +400°C
- 2 laser pointers
- Response time
