

TEXT THERMOMETER mod. 805 INFRARED -25° to +250°C

vedi prodotto online

SOLUZIONI FOODSERVICE

The infrared thermometer, only 80mm long, is practical to carry and always at hand, for example for inspecting incoming goods or for temperature control in supermarket refrigerated counters. It is also the ideal instrument for quick measurements in the food industry and also at home. Thanks to the TopSafe protective case, it is watertight and protected against shocks and dirt according to protection class IP 65. The instrument has a scan mode for permanent measurements, as well as a Hold function, which allows you to freeze measured values. It is also possible to reliably display the minimum and maximum values.

TECHNICAL DATA

- Measurement point distance 1:1
- Measurement range from -25 to +250 °C
- ABS case
- Duration 40h (standard) with 1 lithium battery: CR2032
- Response time
