SOLUZIONI FOODSERVICE

The 4.5-liter terracotta pot from VULCANIA stands out for the absolute quality of the materials used. Made from the finest Italian clay, purified and refined, it guarantees maximum food safety thanks to its chemical inertia, even at very high temperatures. The glazes used are certified and compliant with the most stringent regulations. Terracotta is an excellent heat conductor, allowing for excellent results in the kitchen: even heat distribution, no temperature variations, and therefore savings in fuel and time. Ideal for creating healthy, light dishes, as it minimizes the use of fat, keeping food warm for longer. Also perfect as a tableware, straight from the stove. - 100% Italian clay, refined and purified - Glazes compliant with
