SANTOS CITRUS SQUEEZER model SPL70G electric single-phase 220V - FRICTION TRANSMISSION

SOLUZIONI FOODSERVICE

Ideal for hotels, bars, restaurants, communities, cafes, cocktail bars, ice cream parlors, pastry shops, institutes, hospitals... A professional juicer, built to last over time, equipped with an asynchronous motor with thermal protection. Great stability and inclined body for better juice outflow. Silent and robust, bowl, filter and pine cone completely removable for easy and convenient cleaning and dishwasher safe. Body entirely in chromed or painted aluminium, bowl, filter and cone in stainless steel. Base for glass in polycarbonate that can be disassembled for cleaning. Suitable for continuous production. Maximum safety: patented system equipped with a safety micro and a mechanical brake for immediate stop and start clutch to reduce the effort to the engine when starting. For all types of glass or carafe, max height 220 mm. Equipped with stainless steel splash guard and start/stop button.
