SOLUZIONI FOODSERVICE

Our silicone brush with plastic handle is an essential item for every kitchen, professional or home. Measuring 6x3.5cm, it has been very carefully designed to meet all your culinary needs. Its brushes, reinforced with fibreglass, offer strength and durability, without giving up the delicate softness that only silicone can give. Ideally heat resistant up to 220° C, it allows you to brush sauces and condiments without problems on still hot dishes, from the oven to the pan. Carefully designed, the brush features bristles that can be easily separated from the sturdy plastic handle, thanks to a practical hole. This feature allows for easy cleaning, preventing food residues from accumulating in the bristles. In fact, the brush is completely dishwasher safe, ensuring maximum hygiene with minimum effort. Another not negligible
