

**EXTERNAL COUNTERTOP VACUUM PACKAGING MACHINE bar  
cm.40 LAVEZZINI ELIX cm.42x28x17H - 450W**

# SOLUZIONI FOODSERVICE

- Overall dimensions mm.420x280x170H
- 400mm sealing bar
- Vacuum pump Q=20/24 LT/MIN
- Weight Kg.9
- Absorption W 450
- Power supply 230V/50-60Hz

Automatic digital vacuum packing machines in stainless steel. For over a decade they have represented a confirmation of quality and durability over time, signed by over 15,000 devices operating on the market. The robust stainless steel structure and the digital electronics with the possibility of selecting the manual/automatic cycle make this machine the most effective solution for retail food distribution.

The indication of the vacuum level allows us to follow the various evolutionary stages of the packaging process.
