# SOLUZIONI FOODSERVICE

- Overall dimensions mm. 510x560x450 H
- Room dimensions 410x450x220H
- 400mm sealing bar
- Vacuum pump Q = 12/14.4 m<sup>3</sup>/h-OIL
- Pressed tank with rounded corners without internal welding
- Manual lid lifting
- Weight Kg.55
- Absorption W 900
- Power supply 230V/50-60Hz

They represent the entry line to the professional world of chamber packaging. Ideal for various application sectors, they are characterized in particular by their excellent construction quality, high performance and an extremely advantageous economic positioning on the market. Equipped with precision electronics but at the same time simple to use, they are able to operate with bags of various types, in external containers and even in external suction by means of embossed bags. Totally in stainless steel, equipped with rounded tanks and without internal welding with removable sealing bars as standard, they are able to guarantee super performance to the small-medium company at the absolute best market price

IT IS RECOMMENDED TO REPLACE THE PUMP OIL ON A YEAR (more if used intensively or with hot products)
