SOLUZIONI FOODSERVICE

LAMA

- High quality stainless steel specifically designed for professional use.
- The steel (X45CrMoV15) contains the ideal ratio between Carbon (hardness, wear resistance, sharpness retention) Chromium (corrosion resistance and ease of cleaning) Molybdenum (acid and corrosion resistance)
- Tempered blade (heat treatment) gives flexibility, strengthens the blade, eliminates internal tensions and possible weaknesses
- High hardness
- Finished manually

HANDLE

- Ergonomic design that guarantees a significant reduction in user fatigue
- Made of polypropylene and rubber, it is non-porous and non-slip even when wet
- Dishwasher safe and sterilizable, in order to guarantee absolute hygiene
- The color of the handle allows you to immediately identify the position of the knife on the workbench for greater safety
