CODICE: 0150025960004

SOLUZIONI FOODSERVICE

Nitrile gloves have characteristics of mechanical resistance (especially to perforation) and chemical resistance superior to Latex gloves, while maintaining excellent elasticity, an aspect always much appreciated in disposable gloves, as it gives sensitivity and ergonomics.

Nitrile gloves are therefore preferable for those jobs where greater mechanical and chemical resistance is required, as well as for those who are allergic to natural latex proteins.

Disposable Nitrile gloves are also suitable for contact with various types of food (with the exception of alcoholic foods - not very present in nature) and for this reason they are increasingly used for handling food products.

WEIGHT SIZE M gr.3,5 (+/- gr.0,2)

CHARACTERISTICS:

- Nitrile
- Dustless
- AQL1.0
- 240 mm long hose
- Textured fingers
- Internal chlorination
- Ambidextrous shape
- Tear-saving cuff
- Not sterile
- Ministerial Decree Class I Dir. 93/42/EEC Dir. 2007/47/EEC
- PPE IIIa Cat. Dir. EEC 89/686
- Tests: EN 455 I-II-III-IV - EN 374 I-II-III
- ASTM F 1670-1671
