SOLUZIONI FOODSERVICE

The 45° Stainless Steel Needle Lever Filler, Special Version, designed to meet the specific needs of your business in a medium-hot environment.

CHARACTERISTICS

16mm Larger Tube and 10mm External Needle: This special version of our filling machine is equipped with an enlarged tube and a thicker external needle, ideal for handling creams and sauces of a thicker consistency at medium-hot room temperatures.

3-Liter Plastic Bucket: The included 3-liter bucket is made of high-quality plastic, ensuring maximum hygiene and easy cleaning. Its large capacity makes filling convenient and efficient.

Compact Design: With a diameter of 19.5 cm and a height of 38 cm, this filling machine is designed to fit easily into any workspace. Its ergonomic design ensures comfortable and intuitive use.

Adjustable Dispensing up to 40g: the ability to adjust the dispensed quantity up to 40 grams allows for precise dosing, ensuring uniform and controlled results in your preparations.

Optimal at Medium-Warm Room Temperatures: This filling machine has been specially designed to offer optimal performance in medium-warm environments, ensuring smooth and controlled dispensing of your creams and sauces.
