

NON-STICK GRILL SQUARES GN 1/1 cm.32,5x53 RATIONAL

SOLUZIONI FOODSERVICE

** RATIONAL PATENT *

USE:

Multilayer grill with Trilax non-stick coating which ensures excellent heat transfer to the food, facilitates browning, is resistant to limescale and much more suitable for use at high temperatures than any other coating.

Thanks to the innovative construction, with the new grid with stripes and checks you immediately have two different motifs in one grid.

Depending on which side is used, the striped and checkered grid creates the classic streaks or checkered pattern typical of American steak houses on your products. The grill is extremely robust and durable. The TriLax® coating has excellent non-stick properties, promotes browning and is particularly suitable for use at temperatures not exceeding 300°C.

Simply load the items to be grilled onto the cold grill and it's ready in seconds, with no need to preheat.

MATERIAL:

Multilayered with TRILAX by Rational non-stick
