

SANTOS SCF50C CHROME JUICER

SOLUZIONI FOODSERVICE

CHARACTERISTICS:

Basket holes diameter 0,5mm
Basket tank, basket filter and sieve in stainless steel
Capacity 40-100 lt.hour
Speed 3000 rpm
Power 600W Single-phase 220V
Weight 16kg
Dimensions mm260x470x450H

Professional juicer centrifuge. Built to last over time, equipped with an asynchronous motor with thermal protection. Silent and robust, built in high quality food-grade materials: motor body, blades, tank and filter in stainless steel, lid, waste container with 7.5 liter capacity and pressure pad in polyethylene, non-slip feet and rubber joints to absorb vibrations. All removable parts are dishwasher safe for easy and convenient cleaning. It completely extracts the juice and vitamins from fruit and vegetables, without the need to clean or cut the fruit into pieces thanks to the large 79.5 mm loading mouth, obtaining an average of 7 liters of juice per 10 kg of fruit.

Maximum safety: patented system, equipped with a safety micro switch and a mechanical brake for immediate stop when the device is opened. Suitable for continuous production. Suitable for all types of glass or carafe, max height 200 mm. Equipped with start/stop button. Supplied with basket filter with stainless steel sieve with 0.5 mm diameter holes
