CODICE: **372**
MARCA: **MOEL**

SOLUZIONI FOODSERVICE

Specially made for large professional environments that require maximum environmental hygiene.

FRAMEWORK

The product is made entirely of AISI 304 stainless steel, welded and treated for use in environments where food is prepared. In order to make it protected against jets of water and dust, the model is equipped with a watertight lamp holder, cable and rubber plug with watertight fairlead, gasket between body and cover. MO-STICK is a trap that allows the monitoring of captured insects. Extremely easy to clean and replace the adhesive cards. The clean and elegant design makes it a decorative, silent and discreet object that hides the sight of insects. MO-STICK can be hung from the ceiling with 2 practical chains, fixed to the wall or simply placed on it.

LAMPS

The 2 powerful 40 W UV-A lamps mounted on a watertight lamp holder are equipped with an anti-shattering sheath to protect the tube: in the event of glass breakage, these are not dispersed into the environment and at the same time the lamp phosphors do not come out. The sheath is perfectly transparent to UV-A rays. The range of action of the lamp is about 15-18 meters.

SAFETY

The model is IMQ approved, IP65 degree of protection and complies with CE regulations.

TECHNICAL DATA:

Dimensions in mm: 655x385x235

Weight: 7.8Kg

Supply voltage: 220-240V ~ 50-60Hz

Total consumption: 40W

Lamp: 2.40 W shatterproof

Lamp life 2000 h

Power Cord: Neoprene

Protection level: IP65

Standard equipment: chain, adhesive paper
