

**UV-A INSECT EXTERMINATOR WITH GLUE PAPER mod. 397 IN PAINTED SHEET METAL**

PROFESSIONAL MOEL ELECTROINSECTICIDE IN WHITE PAINTED SHEET METAL WITH UV-A LAMPS AND FLYPAPER FOR FLYING INSECTS

# SOLUZIONI FOODSERVICE

Specially made for large professional environments that require maximum environmental hygiene.

## PLACEMENT

The lamps must be installed away from the main light sources (windows, etc.) and it is necessary to avoid placing the lamps in full draft which could disturb the flight of insects. It is necessary to avoid installing the mo-sticks above the production points because the aim is to keep the insects away from these areas.

The ideal connection is between the entry points and the production points in order to capture the insects before they reach the critical points of production.

The range of action of the lamp is about 15-18 meters.

## FRAMEWORK

The product is made of white painted sheet metal.

## CHARACTERISTICS:

Dimensions in mm: 655x390x235

Weight: 7.8Kg

Supply voltage: 220-240V ~ 50-60Hz

Total consumption: 40W

Lampada: 2.40 W shatterproof

Lamp life 2000 H

Power Cord: Neoprene

Protection level: IP65

Standard equipment: chain, adhesive paper
