With Triton you can obtain crushed ice in various sizes with a simple adjustment of the knife:

- finely chopped ice for traditional granitas,
- ice in larger sizes for preparing cocktails or for garnishing cold dishes for serving or displaying.
- Safety micro on the loading mouth.
- Safety micro switch on the ice collection tray.
- Mouth in polished aluminium.
- Components and small parts in stainless steel.
- Supporting structure in aluminum and steel.
- Shell and collection tray in food-grade thermoformed plastic material.
- Multi-ribbed belt with low power absorption.
