

THREE SWORDS FILLING MACHINE KG. 10 PAINTED

vedi prodotto online

SOLUZIONI FOODSERVICE

The Mod. 10 sausage filler is a manual sausage filler with a cylinder capacity of 10 litres.

The bagging machine is certified for suitability for food contact (DL 108/92-EEC directive 89/109)

The Tre Spade Mod. 10 sausage filler is built to last over time: the choice of materials, the quality of the finishes, the construction choices have always made it one of the best-selling and most recognized sausage stuffers on the market.

The double speed of the piston allows a much faster reloading: with the high speed a fast return of the piston is guaranteed, limiting the loss of time. With the reduced speed, the torque increases and the effort to be performed during the bagging process is reduced. There is less effort and a greater compression force, always with a seal guaranteed by the silicone gaskets of the piston.

The stainless steel cylinder is watertight

The rack is made of carbon steel

The gears are made of pressed and hardened steel, to guarantee resistance over time

The reducer block is made of aluminum with self-lubricating bushings

the piston is in Moplen equipped with silicone gasket and breather valve

Four sizes of plastic funnels are included in the package: diameters 10,20,30,40 mm

Capacity: 10 litres

Weight: 20.0kg

Dimensions: 73x24x22 cm
