SOLUZIONI FOODSERVICE

Professional blender mixer ideal for blending, whipping and homogenizing large quantities of product. Suitable for hotels, bars, restaurants, cafes, cocktail bars, discos, ice cream parlors, pastry shops... Powerful, silent and robust, built to last over time and equipped with an asynchronous motor with thermal protection designed for intensive use.

It also easily crushes ice and can be used for hot or cold drinks. Equipped with electronic variable speed drive from 500 to 15,000 rpm. Engine body in chromed aluminum. Possibility of combining it with a 2 L or 4 L carafe (OPTIONAL to be purchased separately) in transparent graduated polycarbonate.

Stainless steel lid with watertight rubber gasket and cap for adding products during operation in complete safety. Exclusive patented locking system of the jug and the lid. Stainless steel knife and carafe base in reinforced aluminum and high resistance resin. Entirely and easily removable for cleaning. Non-slip feet for high stability. Start/stop switch with electronic speed variator.
