

ALUMINUM DONUT MOLD WITH CONCAVE BOTTOM cm.26x8,5

SOLUZIONI FOODSERVICE

USE

Aluminum donut mold for pastry and gastronomy.

The dark patina that forms inside the aluminum trays is determined by the spontaneous oxidation of the metal: a real inert protective barrier that must not be eliminated. For those who always want to have shiny cooking containers, they must use specific products. When using for the first time, it is best to wash with water and pre-condition it, i.e. lightly grease the inside with oil or butter.
