

TRANSPARENT POLYCARBONATE GLASS ml. 350

vedi prodotto online

CODICE: 0710017801350

SOLUZIONI FOODSERVICE

Polycarbonate, derived from the compound and is used in the synthesis of plastics.

The main characteristics are: RESISTANCE and HARDNESS.

It is the plastic material more resistant to scratches and bumps, as well as having a higher elasticity than other plastic materials and has less tendency to yellow than Plexiglas.

TECHNICAL FEATURES:

- Material: Food grade polycarbonate
- Capacity: 350cc
- Color: Transparent
- Transparency: It has a transparency index of 0.86, therefore good.
- Resistance: It has excellent impact resistance, is unbreakable and very resistant.
