SOLUZIONI FOODSERVICE

The polypropylene mesh is a versatile and reliable accessory designed to meet food storage and preparation needs in a safe and practical way. Made with high quality materials, this net was designed and produced in Italy, guaranteeing high standards of quality and safety.

Main features:

- **Universal Fit:** Our polypropylene mesh is designed to suit a wide range of uses, making it ideal for various kitchen and food preparation applications.
- **Food Safety:** Made with high quality polypropylene, our net has been certified for food use, ensuring maximum safety when handling and storing food.
- **Freezer Compatibility:** This net is ideal for use in the freezer, allowing food to be stored efficiently and safely at low temperatures.
- **Suitability for Microwave Oven:** Thanks to its heat resistance, the mesh can be safely used in the microwave to reheat or cook food.
- **Easy to Clean:** The polypropylene mesh is dishwasher safe, greatly simplifying the cleaning and maintenance process after use.
- **Durable Materials:** Made with high-quality polypropylene, this net is strong and durable, ensuring long-lasting durability.

Recommended Applications:

- Glass support.
- Accessory insert in basins or containers.
- Food storage in the refrigerator and freezer.
- Microwave cooking.
- Preparation and presentation of various dishes and foods.
- Use in domestic and professional contexts.
