SOLUZIONI FOODSERVICE

APPLICATIONS

SENO&SENO detergent for dishes and plates is a caustic liquid detergent for mechanical washing of dishes and glasses.

In combination with a highly alkaline base and sequestering components, they allow good detergency, stain-removing capacity and control of water hardness.

ADVICE ON USE

The detergent can be used in all types of dishwashers in combination with automatic dosing and product concentration control equipment.

Do not use the product on aluminium, silverware and silver.

Dosage:

-Fresh water (0 to 15°F) approx. 1 g/L

-Medium water (16°F to 25°F) approx. 2 g/L

-Hard water (over 25°F) approx. 3 g/L

PRECAUTIONS FOR USE

Avoid impacts and improper handling of the packages which can cause the product to leak.

After use, close the container and store away from heat sources. The product is not flammable.

The product is not flammable.
