SOLUZIONI FOODSERVICE

The Black Plastic Square Ice Bucket is an elegant and functional accessory for cooling bottles of sparkling wine, wine or other beverages. Ideal for use in professional environments such as restaurants, hotels, buffets or events, it is designed to keep drinks cool in a practical and refined way.

Main Features:

- Square Design: Base size of 22x22cm and opening of 33x33cm, which provides ample space to hold 4 bottles.
- High Quality Material: Made of black SAN plastic material, a special type of sturdy plastic, resistant to impacts and easy to clean. 6mm thickness for greater durability over time.
- Bottle Placement: Two of the four corners are curved, specially designed to facilitate the placement of bottles, offering a safe and stable support.

Technical Specifications:

- Height: 26 cm, to ensure perfect immersion of the bottles in the ice.
- Versatility: It works both as a champagne bucket and as a bottle holder and ice bucket, making it an indispensable element for table service or buffets.

This Black Plastic Square Ice Bucket combines aesthetics and practicality, offering a touch of class to the presentation of drinks, whether for a special occasion or for everyday use.
