SOLUZIONI FOODSERVICE

CHARACTERISTICS:

- Door opening mm. 465
- User interface with soft-touch keys.
- Newly developed polychromatic LCD display.
- Built in integral double wall.
- Pressed tank, with integral stainless steel filter.
- Atmospheric boiler with rinse pump.
- Integrated detergent and rinse aid dispensers.
- Partial drain with pump and triple filter.

High capacity hood dishwasher with mm. basket. 500x600 full optional equipped with a new user interface with soft-touch keys and a new concept polychromatic LCD display.

Built in integral double wall with hood equipped with thermo-acoustic insulation.

The tank is molded and is equipped with an integral stainless steel filter.

Lifting the hood is smooth and the operator's effort is reduced.

The washing chamber has no internal pipes and edges and thanks to its large capacity it is able to contain tools of the most disparate shapes and sizes.

Equipped with lower and upper rotating wash and rinse arms (3 spokes).

Peristaltic detergent and rinse aid dispensers adjustable from the control panel and the triple filter on the drain are standard.

The 94LXCDE version can be combined with the WS140 reverse osmosis device.
