

**WINTERHALTER REVERSE OSMOSIS WATER TREATMENT SYSTEM
MOD. AT EXCELLENCE-M**

SOLUZIONI FOODSERVICE

CHARACTERISTICS:

- Dimensions mm. 365x505 H493
- Capacity/h - treated water 180l/h
- Minimum dynamic pressure.
- Water supply temperature Max 35°C
- 230V power supply

The external reverse osmosis device AT Excellence-M wins over customers with perfect and constant washing results.

The AquaOpt function, after a wash pause, ensures that the water is treated until it reaches the desired quality.

The operating status of the AT Excellence devices is shown on the display of the device itself. Faults are detected immediately and can be eliminated quickly.

The legally required water safety device (WSE) is already present in the AT system in combination with dishwashers.

The AT Excellence can be connected to the dishwasher quickly and easily via plug and play. Various safety devices and integrated sensors ensure the best washing results and optimal protection of the appliance.
